

ROYAL PADS®

ROYAL LIQUID®

CATALOG 2026

COMPOUNDS

Royal Liquid polishing compound system meets the needs of even the most demanding detailers. Using modern technology and high-quality raw materials, these compounds combine powerful cutting power with a flawless finish. Whether you're removing deep scratches or refreshing delicate paintwork, Royal Liquid ensures speed, minimal dust, and easy application.

Royal Liquid Heavy Cut

Royal Liquid Heavy Cut is a modern, silicone-free, water-based polishing compound. Designed for the rapid restoration of severely damaged paintwork and the removal of deep scratches. Thanks to its highly abrasive and consistent grains, the product provides high cutting efficiency combined with a good finish. The compound effectively removes marks from P1200 abrasive and up. Heavy Cut allows for long-lasting, low-dust polishing. The compound is very easy to apply and is ideal for all types of paintwork, from medium-hard to hard.

Available capacity: 1000ml, 250ml, 100ml (Test Box)

Royal Liquid Medium Cut

Royal Liquid Medium Cut is a modern, efficient, silicone-free, water-based polishing compound for quickly restoring moderately damaged paintwork and removing light scratches. It effectively removes medium scratches and sandpaper marks from P2000 and up. Thanks to its highly abrasive and consistent grains, the product provides high polishing efficiency and a high gloss. Medium Cut allows for exceptionally long polishing periods with minimal dust. The compound is very easy to apply and is ideal for all types of paintwork, from medium-hard to hard, scratch-resistant.

Available capacity: 1000ml, 250ml, 100ml (Test Box)

Royal Liquid Ultra Finish

Royal Liquid Ultra Finish is a modern, highly efficient, silicone-free, water-based polishing compound. It's ideal for permanently removing very fine scratches, holograms, and P6000 sandpaper marks from all types of paint. Thanks to its special, high-performance abrasive particles, the polish is also ideal for scratch-resistant clear coats. The use of special, highly homogeneous materials allows for a brilliant and durable high-gloss finish. Holograms and fine scratches are removed mechanically, as the polish has no filling properties.

Available capacity: 1000ml, 250ml, 100ml (Test Box)

OPEN FLOW series

Open Flow series is a great solution for professionals and detailing enthusiasts who expect maximum performance, precision and control during work. The line includes innovative polishing pads with an open cellular structure, high -quality microfibers and efficient polishing wool – all designed for effective and safe varnish correction.

Woolzilla

Available sizes:

30mm
38mm
50mm
80mm
130mm
153mm

Innovative polishing hybrid wool created for professionals who expect unparalleled cutting effectiveness while maintaining high control over the polishing process. Our hybrid wool is a unique combination of 85% short, natural wool and 15% synthetic technical fiber, designed specifically for evenly distributing compound and minimizing dusting.

Woolzilla also works great with “Marine” polishing compounds. The product is suitable for polishing the jelicot.

One Touch Wool

Available sizes:

30mm
38mm
50mm
80mm
130mm
153mm

One-Touch Wool is a modern polishing wool made of 100% advanced synthetic technical fiber, optimized for one-stage paint correction. Thanks to the properly selected length and density of the bristles, wool combines the moderate cutting force with the possibility of obtaining a high quality finish – without having to change it rains during the process.

FiberCut

Available sizes:

30mm
38mm
50mm
80mm
130mm
153mm

FiberCut is a high -performance pad of microfiber polishing, specially designed for aggressive varnish correction. The structure of the fibers and their density have been optimized in terms of effective removal of deep defects, such as scratches, matting or lamps from sandpaper, while maintaining a stable operating temperature.

OPEN FLOW series

OF Heavy Cut

Available sizes:

30mm
38mm
50mm
80mm
130mm
153mm

Open Flow series Heavy Cut polishing pad is designed for maximum effectiveness in removing deep scratches, dull spots, and serious paint defects. Made of high-quality open-cell foam, it provides excellent air circulation, effectively reducing surface heat buildup during operation.

Recommended for use with heavy-cut compounds in processes where the priority is the quick and effective removal of serious paint imperfections.

OF Medium

Available sizes:

30mm
38mm
50mm
80mm
130mm
153mm

Open Flow Medium Polishing Pad is a versatile tool for removing moderate scratches, holograms, and finer sandpaper marks. Made of open-cell foam, it provides excellent ventilation during use, reducing the risk of overheating the paint and extending the pad's life.

Recommended for use with medium-cut or one-step polishing compounds, especially in projects where rapid restoration of colour depth and gloss with a minimum of steps is important.

OF One Step

Available sizes:

30mm
38mm
50mm
80mm
130mm
153mm

Open Flow One-Step polishing pad was designed for maximum efficiency in one-step work, combining cutting ability with a high-quality finish. Made of open-cell foam, it guarantees optimal air circulation, reducing paint heat and ensuring stable performance throughout the entire process.

Recommended for use with one-step polishing compounds, especially when time is of the essence and a high visual effect is desired.

OF Finish

Available sizes:

30mm
38mm
50mm
80mm
130mm
153mm

Open Flow Finishing polishing pad is designed to give paint work maximum colour depth and a mirror-like shine. Made of open-cell foam, it provides excellent air circulation, minimal the risk of surface overheating and guaranteeing stable operation even during long polishing sessions.

Recommended for use with finishing compounds in the final stage of paint correction to achieve maximum clarity and a "show car finish."

YOUR SHINE, OUR PADS

AIR series

AIR series are closed-cell polishing pads compatible with Dual - Action machines with orbital and planetary movement and any types of compounds. Conical foam side profile and central hole ensure the highest level of work efficiency and safety.

AIR Heavy Cut

Available sizes:
30mm
38mm
50mm
80mm
130mm
153mm

YOUR SHINE, OUR PADS

PRO series

PRO series are close-cell polishing pads compatible with rotary polishing machines and work with any type of compounds. The foam side profile we developed allows for the highest level of work and safety.

PRO Heavy Cut

Available sizes:
80mm
130mm
153mm

PRO Hard

Available sizes:
80mm
130mm
153mm

PRO Medium

Available sizes:
80mm
130mm
153mm

PRO One Step

Available sizes:
80mm
130mm
153mm

PRO Soft

Available sizes:
80mm
130mm
153mm

PRO Finish

Available sizes:
80mm
130mm
153mm

PRO Finish Crown

Available sizes:
130mm
153mm

YOUR SHINE, OUR PADS

THIN series

THIN series are closed-cell low profile polishing pads compatible with Dual - Action machines any types of compounds. The low foam height used results in give better control of the DA machine and greater transmission of the machine's oscillating movement to the work surface compared to polishing pads of standard thickness.

Conical foam side profile and central hole ensure the highest level of work efency and safety.

THIN Heavy Cut

Available sizes:
80mm
130mm
153mm

A blue circular polishing pad is shown next to its black and green packaging. The packaging features a crown logo and the text 'THIN' and 'POLISHING PADS'.

THIN Hard

Available sizes:
80mm
130mm
153mm

A white circular polishing pad is shown next to its black and green packaging. The packaging features a crown logo and the text 'THIN' and 'POLISHING PADS'.

THIN Medium

Available sizes:
80mm
130mm
153mm

A yellow circular polishing pad is shown next to its black and green packaging. The packaging features a crown logo and the text 'THIN' and 'POLISHING PADS'.

THIN One Step

Available sizes:
80mm
130mm
153mm

An orange circular polishing pad is shown next to its black and green packaging. The packaging features a crown logo and the text 'THIN' and 'POLISHING PADS'.

THIN Soft

Available sizes:
80mm
130mm
153mm

A red circular polishing pad is shown next to its black and green packaging. The packaging features a crown logo and the text 'THIN' and 'POLISHING PADS'.

MICROFIBER

Royal Pads also offers microfibers from 2023, we have microfiber cloths in our offer, the offer of which will be gradually developed to provide our customers with carefully selected products that allow for the safe drying of paint or the application of polishing compound, wax, quick detailer and similar products.

PRINCE TOUCH 500GSM

Fluffy and delicate edgeless microfiber. It is an excellent choice for working with quick detailers, quick waxes, waxes, polishes, etc. It is ideal for cleaning the exterior surfaces or removing dirt from the interior of the vehicle without the risk of scratching.

Composition: 80% polyester, 20% polyamide | Dimensions: 40x40cm

ALLROUNDER TOWEL 250GSM

Delicate microfiber made of short and very soft fibers, thanks to which it is perfect for lapping products dedicated to protecting the paintwork without leaving microfibers on the surface. In addition, it is great for removing light external dirt or removing dirt from the inside of the vehicle.

Composition: 70% polyester, 30% polyamide | Dimensions: 40x40cm

GLASSFIBER 400GSM

Edgeless, waffle microfiber designed for cleaning glass and mirror surfaces. The waffle surface of the cloth allows for thorough cleaning without leaving streaks and micro-hairs.

Composition: 80% polyester, 20% polyamide | Dimensions: 40x40cm

APPLICATION MICROFIBER (SUEDE)

Very soft microfiber, size 10x10cm, intended for application of protective coatings.

ROYAL POLISHING CONE

Open-cell polishing cone, dedicated to polishing in hard-to-reach places, e.g. rims, exhaust system, bumper elements, door handle recesses.

Cutting - burgundy
Medium - orange
Diameter: 80mm | Cone height: 80mm

ROYAL POLISHING BALL

Open-cell polishing ball, dedicated to polishing in hard-to-reach places, e.g. rims, exhaust system, bumper elements, door handle recesses.

Cutting - burgundy
Medium - orange
Finish - Red

Diameter: 80mm

ROYAL MINI POLISHING CONE

Open-cell polishing cone, dedicated to polishing in hard-to-reach places, e.g. rims, exhaust system, bumper elements, door handle recesses.

Cutting - burgundy
Medium - orange
Diameter: 25mm | Cone height: 45mm

ROYAL NANO POLISHER SET

Set of 4 polishing pads with a diameter of 16mm or 25mm, dedicated to the nano polisher machine. The set includes foams with hardness:

SOFT / MEDIUM / ONE STEP / HEAVY CUT.

DETAILING accessories

Royal Pads brand also offers a range of applicators dedicated to work both inside and outside the vehicle. Applicators are completely safe for painting and plastics when applying products such as waxes, politures, dressings.

ERGO hand

High-quality applicator with a soft handle made of soft and efficient foam. The delicate structure ensures safe work with paint.

ERGO hand +

High-quality applicator with a hard handle and a very delicate working surface, which ensures completely safe work even on the most demanding paints.

REMOVER

High-quality abrasive applicator with a hard handle, made of medium-hard "Medium polishing" foam. Applicator dedicated to all medium-abrasive and abrasive polishing pastes and AIO type products.

DUAL

Double-sided, manual polishing sponge designed to remove minor scratches and abrasions. The product is made of white foam "Hard polishing" dedicated to abrasive polishing compounds and red foam "Soft polishing" dedicated to finishing polishing compounds.

DETAILING accessories

TIRE Applicator

Ergonomic applicator for use with tire dressings made of dense foam.
Applicator contour designed to work with any tire profile.

UFO Applicator

Standard applicator made of soft, dense foam.
Delicate structure ensures safe work on the outside and inside of the car.

CLEANER Applicator

Standard, gently abrasive applicator made of red "Soft polishing" foam.
Applicator dedicated to all abrasive cleaners.

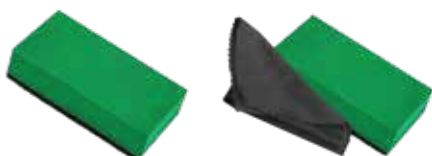

SAFE Wash Sponge

A delicate, safe sponge for washing paint.
The profiled working surface ensures thorough rinsing of dirt..

STANDARD and MINI versions are available.

COAT Applicator

Applicator designed to work with all coatings dedicated to paint protection.

Plus version is with two application cloths in pack.

DETAILING accessories

DOUBLE_Scруб Pad

Equipment for cleaning the interior of your car – effectiveness, gentleness and ergonomics in one. Discover a new dimension of cleanliness with our Double_Scруб Pad, designed specifically for cleaning the interior of your car. This handy and durable pad combines cleaning effectiveness with safety for delicate surfaces, making it ideal for removing stubborn dirt from plastic, vinyl, leather and fabric upholstery.

Micro-Pocket

Microfiber applicator designed for precise application of dressings, waxes and paint coatings. The size and shape of the applicator allows you to work outside and inside the car, and the finger pocket provides a secure grip and improves work comfort. Micro-Pocket is made of delicate microfiber with stitching inside the applicator, which makes it very safe to use.
